Kills by Year

The Insights I found from this dashboard:

1. In total, there were 412,000 killings, with 6,633 perpetrators committing suicide and 5,740 claiming responsibility for the murders. Notably, approximately 162,000 murders were successfully carried out.

2. The data was segmented by years and countries to facilitate easy interpretation. Additionally, a map visualization was included to pinpoint the exact locations of the killings.

3. The year 2014 recorded the highest number of killings. Firearms and explosives emerged as the primary weapons used in these incidents, while armed assaults and bombings were the most prevalent attack types resulting in casualties.
